

Axians IT Security × Akamai Guardicore — Joint Capabilities

For German Mittelstand manufacturers evaluating network microsegmentation, the Axians–Akamai partnership provides the only offer combining world-class technology, local German service delivery, and manufacturing sector expertise.

Axians IT Security Services — Credentials

Market recognition	ISG Benchmark Leader 2025 in 4 cybersecurity categories
Geographic footprint	65 offices across Germany; SOCs in Hamburg and Ulm
Team	>400 cybersecurity specialists in Germany; language: German
Certifications	ISO 27001 and ISO 9001 for both SOCs; BSI-recognized processes
Partner ecosystem	Part of VINCI Energies — global industrial group; Actemium OT delivery
Manufacturing focus	References in mechanical engineering, automotive supply, electronics manufacturing

Akamai Guardicore Segmentation — Product Credentials

Analyst recognition	Forrester Wave — Microsegmentation Solutions; Gartner Peer Insights 4.8/5
Global telemetry	Largest commercial network; trillions of daily observations
OT capability	Only enterprise segmentation with agentless OT via NVIDIA BlueField DPU (GA Q2 2026)
Threat detection	Built-in breach detection, deception, and AI anomaly detection
ROI	Forrester TEI: 152% ROI, 6-month payback for composite €1B manufacturer
Reference win	Victorinox: chose Guardicore over Illumio following comparative evaluation

The Joint Engagement Model

Axians manages the customer relationship and service delivery. Akamai provides the technology platform, global threat intelligence, and product roadmap. Together, we offer:

- NIS2 readiness assessment (Axians-led, Guardicore-powered) — scopes the segmentation gap
- 30-day proof of value (discover only; no enforcement; full OT visibility)
- Architecture workshop — production network segmentation design with your IT/OT team
- Full deployment and managed microsegmentation service via Axians SOC Hamburg or Ulm
- Ongoing compliance evidence generation for NIS2, TISAX, KRITIS auditors
